

# SPOTLIGHT

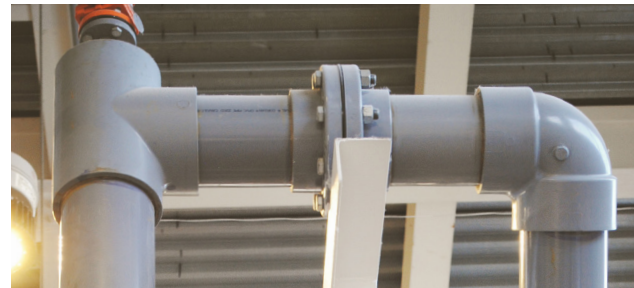

PRECISELY ENGINEERED. REAL-WORLD TESTED.

**The largest independent distributor of a popular automobile brand simplified its system design by choosing Corzan® CPVC as a single piping solution to handle potable water, washing fluids and process water in its new auto processing facility.**

Roughly one mile of Corzan CPVC piping was installed across multiple applications in the 340,000-square-foot, state-of-the-art Florida facility, ranging from ¾ to 4 inches in diameter. Here's why they chose Corzan CPVC:

- It resists both internal and external corrosion, a critical requirement in geographies with high-salinity conditions.
- Unlike many other materials, it does not require specialized tools such as a press gun or specialized training such as sweating, brazing or welding, simplifying installation.
- A dedicated field representative from Lubrizol made several visits to the site to confirm quality installation and strong joints.
