

SPOTLIGHT

PRECISELY ENGINEERED. REAL-WORLD TESTED.

One of the U.S.'s largest plumbing and mechanical contractors trusts Corzan® CPVC so much that they installed 20,000 feet of it, from tie-in to tap.

When Nash Plumbing & Mechanical outgrew its headquarters, Corzan CPVC was the obvious choice for the entire building's plumbing. Here's why:

- Multiple joining methods provide flexibility and support faster installation compared to metal or other plastic options.
- It is inherently corrosion-resistant and is not susceptible to pinhole leaks common to copper piping.
- It is tested and approved per NSF/ANSI 61 to protect against water contamination and is plenum rated.
- For more than 20 years, Nash has valued Corzan CPVC not only as a reliable material but for the partnership behind it, with a team of experts always available to provide guidance and support when it matters most.
